

Recovery 20/08/20  
Finder Neil Bradley  
Wrist Watch

#### Liane

Whilst pruning my grape vines I checked the time and later when I got to my house I realised my watch was missing. I know which rows I was working on and the route back home. It's a titanium strap so unsure if that's a challenge. Would anyone be able to help me find it, I would be grateful as I have worn it for 26 years.

#### Neil

I duly contacted Liane and I am pleased to say just under an hour of searching I was able to find the watch in the last vine row she was pruning. I was overjoyed and couldn't wait to reunite her fond possession back to her.

#### Dear Neil,

Can't tell you how delighted I was to be reunited with the watch I have worn for 26 years which I had lost whilst pruning in our vineyard last week. My concern was increased by the terrible rain we have had but it was great to find it still working. I'd looked around the areas I had been working but felt that using MD technology would help as there was a lot of undergrowth in the field as the picture shows. I so much appreciated you calling round so promptly and offering to help at no charge. it was very kind of you and ABSOLUTELY made my day. **Liane**
